

DIVYANSHU GUPTA

Kasganj, Uttar Pradesh, India | +91 9456430603 | divyanshugupta415@gmail.com

[Portfolio](#) | [Linkedin](#) | [Github](#) | [Leetcode](#)

SUMMARY

Computer Science graduate with hands-on experience diagnosing bugs, troubleshooting full-stack applications, and analyzing security vulnerabilities. Comfortable learning new tools quickly, working through ambiguous technical problems, and communicating solutions clearly — seeking to bring a customer-first, problem-solving mindset to a Technical Support Engineering role.

EDUCATION

Bachelor of Technology, Computer Science — GLA University, Mathura

Intermediate — Shemford Futuristic School, Kasganj

High School — Shemford Futuristic School, Kasganj

TECHNICAL SKILLS

Networking & Web: REST APIs, HTTP/DNS fundamentals, Cloud Computing, Docker (basic)

Languages: Java, Python, JavaScript, SQL

Frameworks / Tools: Node.js, Express.js, Spring Boot (basic), Shell Scripting

Databases: MongoDB, SQL, Data Protection

CS Fundamentals: Data Structures & Algorithms, Low-Level Design (intermediate), OOP

Version Control: Git, GitHub

AI-Assisted Development: Experience using AI coding assistants (e.g., Claude, ChatGPT) to accelerate debugging and code review

INTERNSHIP / TRAINING EXPERIENCE

Advanced Cyber Security and Bug Bounty with Real-World Problems

GLA University, Mathura | June 2025 – July 2025

- Analyzed and triaged security vulnerabilities across web applications, building a practical understanding of how to identify, reproduce, and document real-world technical issues.
- Used industry-standard security and diagnostic tools in simulated environments to test and validate fixes for vulnerabilities — directly analogous to reproducing and resolving customer-reported bugs.

PROJECTS

SynqX — Real-Time Chat Web App ([SynqX](#))

- Built a server-based chat app (HTML, EJS, CSS, JavaScript, Node.js, Firebase Realtime Database, PeerJS) with authentication and message fragmentation for reliable transmission.
- Used Hotjar heatmapping to identify usability friction points and debug user-flow issues, improving the app's architecture based on real usage data.

RollCall — Smart Attendance Portal ([RollCall](#))

- Developed a role-based attendance system (Owner, Admin, Student) using real-time location and device-lock checks to prevent proxy attendance.
- Diagnosed and resolved location-spoofing and device-lock edge cases through iterative testing, and continue to extend the system with Android support.

CodeSynq — Real-Time Collaborative Code Editor ([CodeSynq](#))

- Built a multi-user collaborative code editor with GitHub push/pull/sync integration, live chat, and cloud-based storage across multiple servers.
- Wrote an automated shell script to set up dependencies, connect to local servers, and troubleshoot environment/configuration failures on every run — reducing setup-related support issues for users.

AcharyaKul – Online Learning Platform ([Acharyakul](#))

- Led a team to build a **scalable platform** with **role-based access**, **secure authentication**, and **hybrid learning via AI Teacher**, managed planning, reviews, and debugging while mentoring peers.
- Developed with **EJS, CSS, JavaScript, Node.js, Firebase**, integrating **AI + physical teacher modules** for automated doubt resolution, personalized feedback, and live mentoring.

PROFESSIONAL ACHIEVEMENTS / CERTIFICATIONS

- Software Engineering — NPTEL Online Course (Nov 2024) ([Link](#))
- Advanced Cyber Security and Bug Bounty — GLA University (Jul 2025) ([Link](#))
- Management Information Systems — NPTEL Online Course, **Topper, Top 5%** (Feb 2025) ([Link](#))
- 300+** LeetCode Problems

PROFESSIONAL SKILLS

- Clear written and verbal communication — documented project setup, debugging steps, and architecture decisions for collaborators.
- Active listening and team collaboration — coordinated with peers across multi-user/multi-server projects to resolve integration issues.
- Comfortable working through ambiguous, undefined problems and thinking abstractly to reach a solution.
